

# **Flag Rock Village**

## **Fire Safety Guidelines**

- React to all fire alarms. The building should be evacuated.
- At a minimum check outside your apartment to ensure there is no fire. Remain alert until the fire department silences the alarm.
- If a fire is observed evacuate immediately and yell “FIRE!” to alert other residents who may be ignoring the alarm activation.
- Use the upper parking lot as a meeting place. Providing a list to responders of the apartments which have their tenants accounted can be very beneficial.
- After safely evacuating call 911 and to notify responders that there is actually an emergency and not just a false alarm.
- Tenants may choose to have a fire extinguisher in their own apartments but they are not required. Any extinguishers should be stored near the egress door so that no one ever goes further into an apartment to retrieve one and have their egress cut off.
