The Lake Mansfield Improvement Project will be underway soon. We expect to begin construction this fall. Please join staff and Lake Mansfield Improvement Task Force members for an overview of the project and construction details.

To participate, please log in using the information above.

The plans are available to download from the Lake Mansfield Improvement Task Force page of the town website:

https://www.townofgb.org/sites/g/files/vyhlf636/f/uploads/lake_mansfield_design_plans_2023.pdf

The project at Lake Mansfield includes enlarging the parking lot at the beach area and installing rain gardens and other stormwater management features to prevent contamination of the Lake and protect water quality. At the north end, for the lake outlet stream, a larger culvert will be installed to prevent flooding of the road. The existing vehicle road along the lake edge will be replaced with a shared use path for walkers and bicyclists. Only emergency vehicles will be permitted to use this portion of the road. The lake edge will be replanted to provide stormwater filtration and a stabilized bank.

When complete, northbound vehicles will no longer be permitted to use the road between the boat launch and beach. All passenger vehicles will enter the recreation area and parking area from the north, via Christian Hill Road.
